Alla Wall Sconce

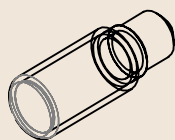

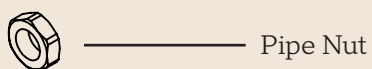

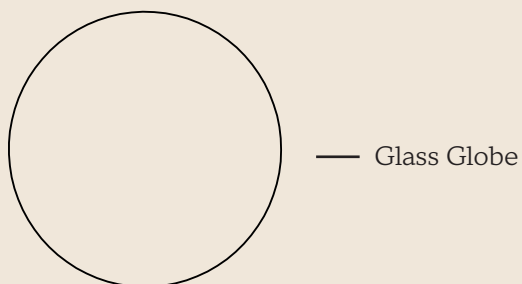

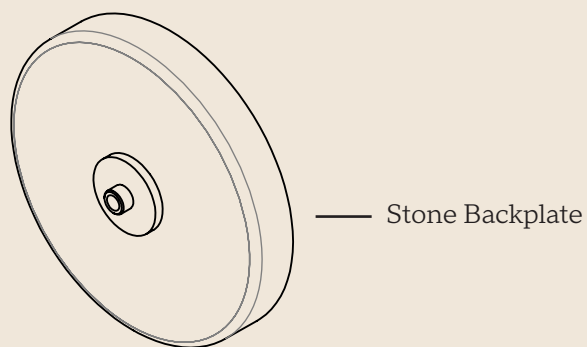

INSTALLATION INSTRUCTIONS

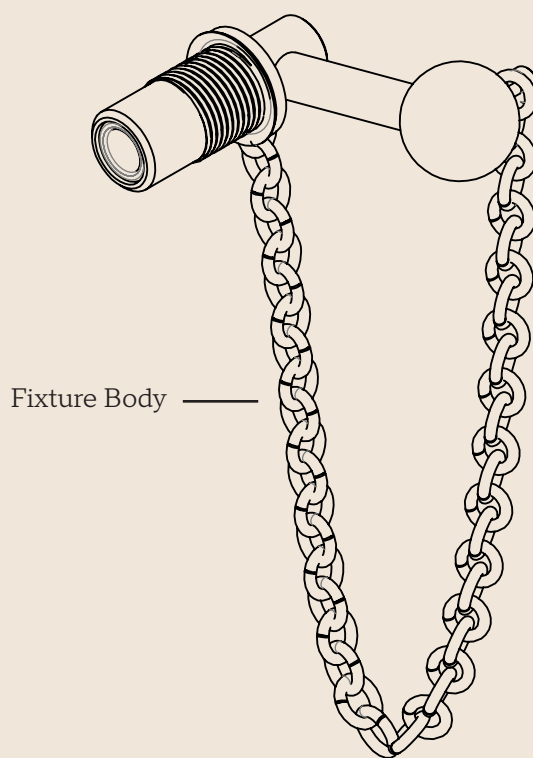

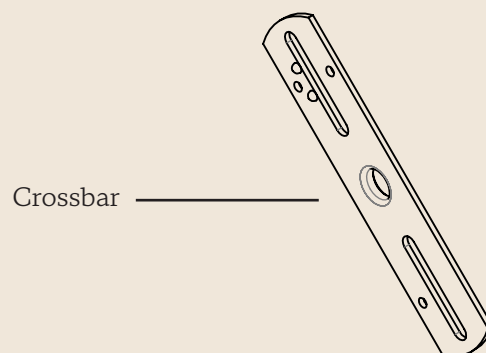

Alla Wall Sconce – Contents

Remove all parts from the box. Place onto a clean, soft surface and inspect for defects/damage.

Note: For clarity, items may not appear to scale on this page.

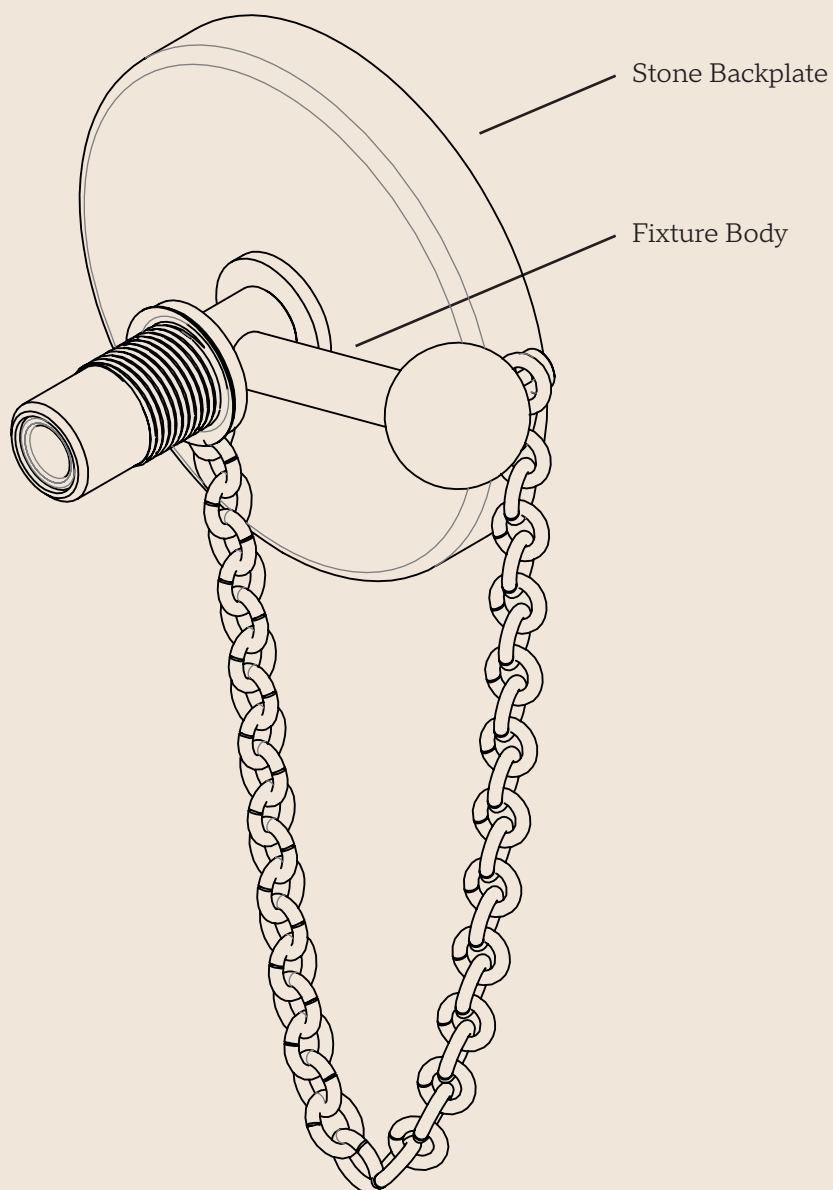

NOTE: Fixture requires (1) E12 socket LED bulb in the T3 or T4 (tube) shape. Bulb not included.

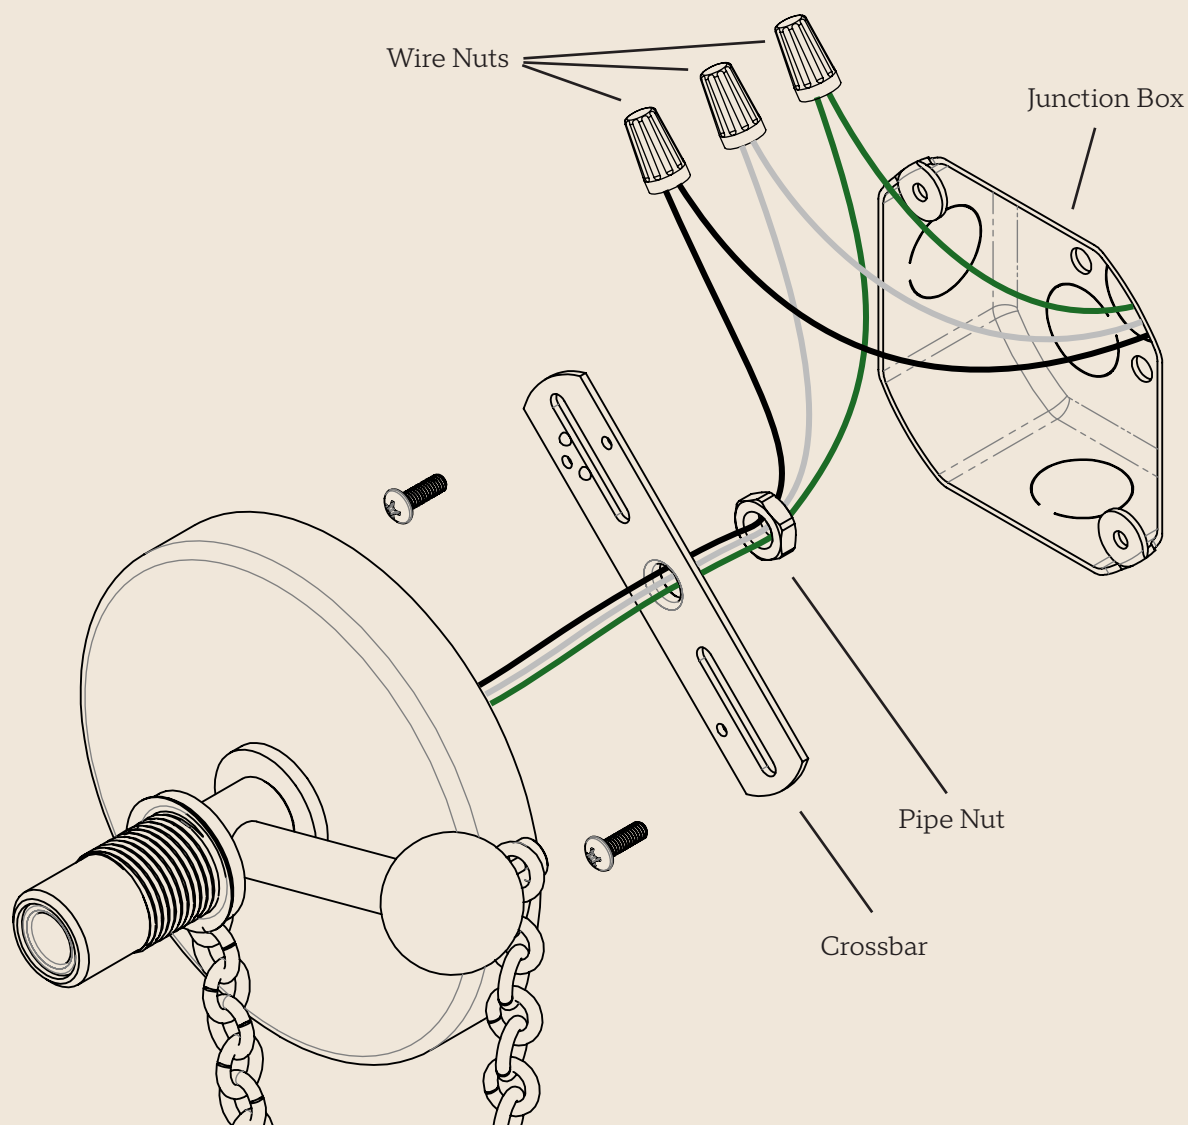

1. Thread the fixture body onto the stone backplate, routing the wires through the center.

2. Route the fixture ground, (+), and (-) wires through the crossbar and pipe nut as shown.
3. Connect the fixture ground, (+), and (-) wires to the corresponding wires from the wall, using wire nuts.
4. Attach the crossbar to the junction box using appropriate screws.
5. Thread the pipe nipple on the fixture into the crossbar and pipe nut to mount it to the wall.
The designed fixture arm angle is 15 degrees from the horizontal.

6. Thread the E12 LED bulb into the socket on the fixture.

7. Thread the glass globe onto the socket.
