

Pillar

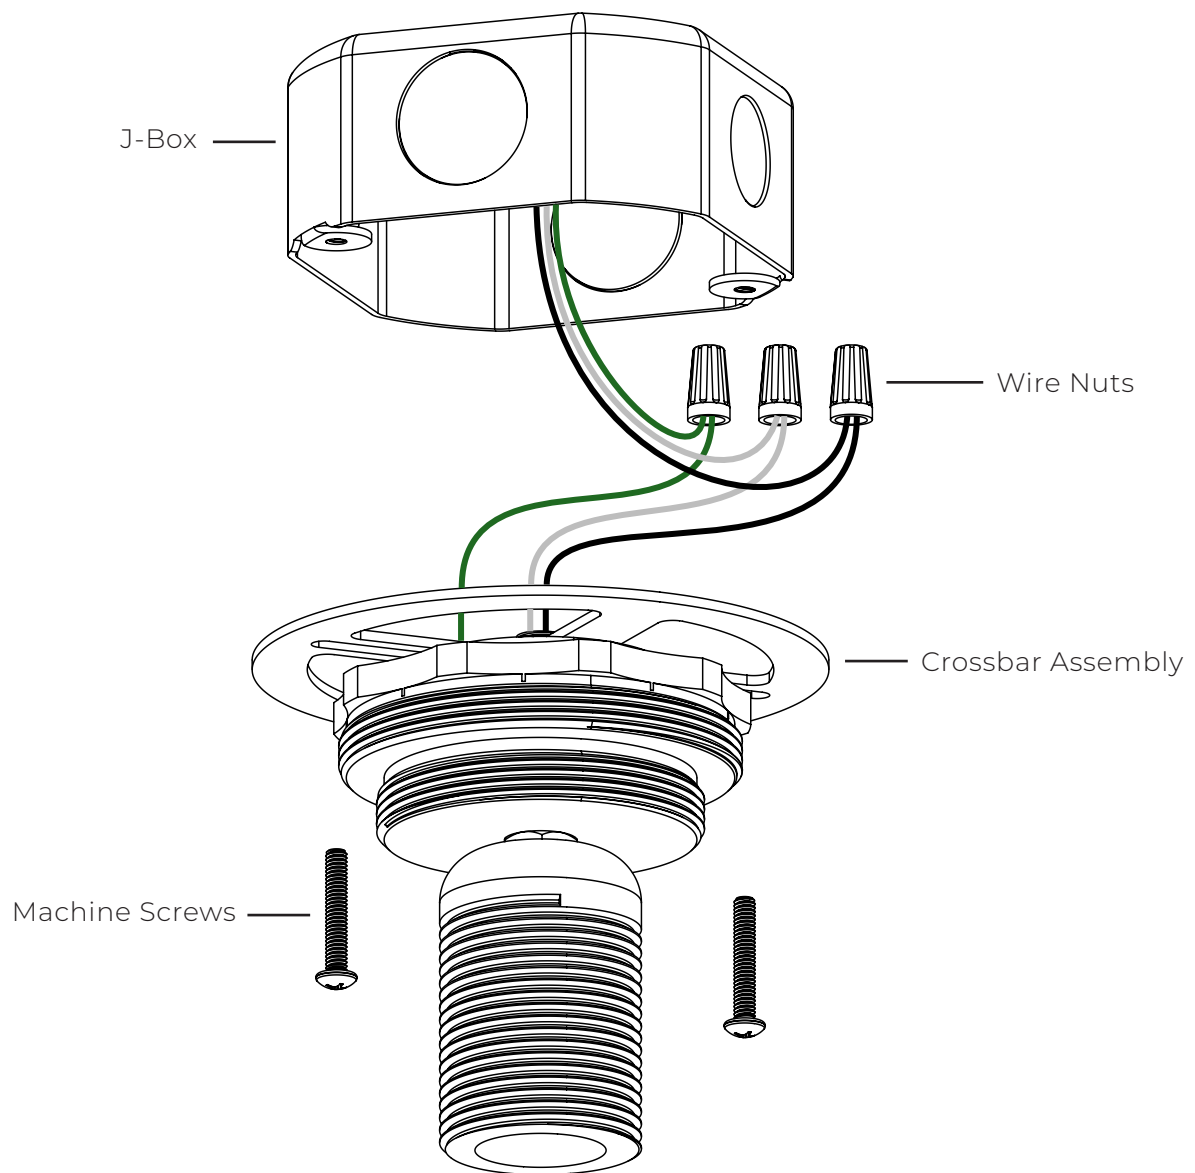

Pillar Contents

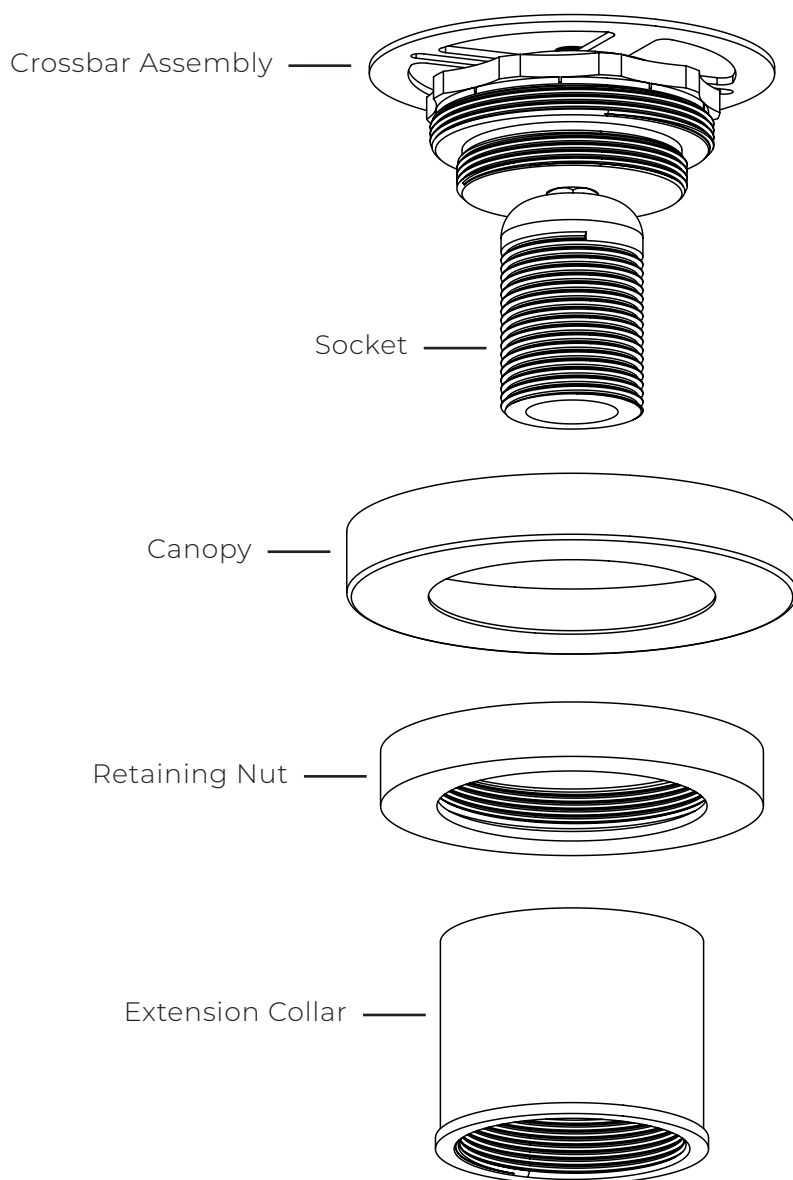

Remove all parts from box onto a clean, soft surface and inspect for defects or damage.

1. Connect the fixture ground wire to the ceiling ground wire. Connect the +/- fixture wires to the +/- ceiling wires. Tuck all wires inside the j-box.
2. Mount the crossbar assembly to the j-box using the 2x machine screws.

3. Slide the canopy over the crossbar assembly until it is flush with the ceiling. Thread the retaining nut onto the crossbar assembly to secure the canopy in place.
4. Thread the extension collar onto the crossbar assembly, with the lip facing downwards.

5. Thread the bulb into the socket.
6. Thread the globe shade onto the socket.
