Lucie Wall Sconce

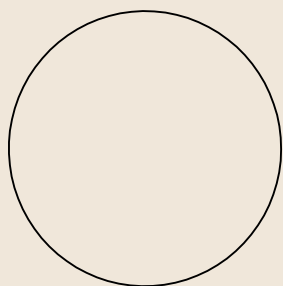

INSTALLATION INSTRUCTIONS

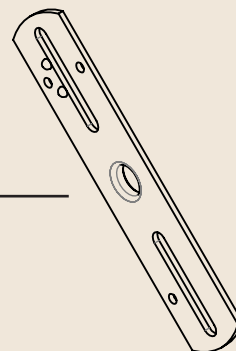

Lucie Wall Sconce – Contents

Remove all parts from the box. Place onto a clean, soft surface and inspect for defects/damage.

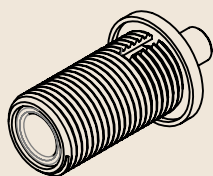

Note: For clarity, items may not appear to scale on this page.

— Glass Globe

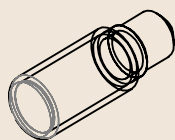

Crossbar —

— Socket Assembly

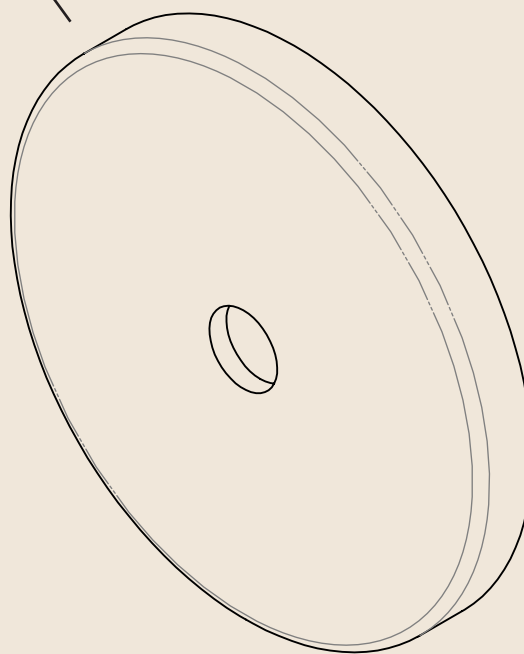

— 3x Wire Nuts

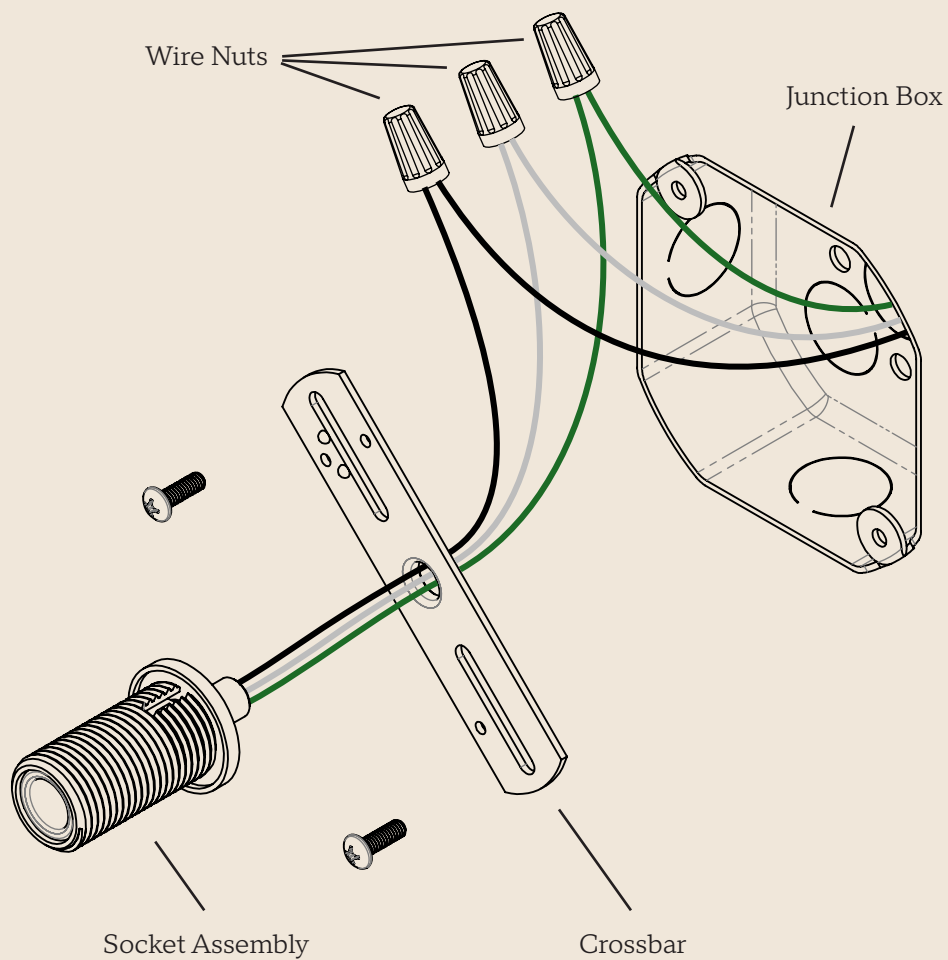

NOTE: Fixture requires (1) E12 socket LED bulb in the T3 or T4 (tube) shape. Bulb not included.

Stone Backplate

1. Route the fixture ground, (+), and (-) wires from the socket assembly through the crossbar as shown.
2. Connect the fixture ground, (+), and (-) wires to the corresponding wires from the wall, using wire nuts.
3. Attach the crossbar to the junction box using appropriate screws.
4. Thread the pipe nipple on the socket assembly into the crossbar to mount it to the wall.

5. Slide the stone backplate onto the socket assembly. Adjust pipe nipple if needed for the backplate to rest on the wall.
6. Thread the E12 LED bulb into the socket assembly.
7. Thread the glass globe onto the socket assembly and tighten it against the stone backplate.
